Islambek Chynybekov

Senior Frontend Engineer | 5+ years | FinTech
Astana, Kazakhstan

Summary

Results-driven Software Engineer with 5+ years of experience, transitioning into AI Engineering. Expert in integrating Large Language Models (LLMs) and AI Agents into production workflows to automate development lifecycles. Proven track record of building RAG (Retrieval-Augmented Generation) architectures for semantic search and leveraging generative models for image processing. Combining deep technical acumen in Python (FastAPI, Pandas, Scikit-learn) with a strong background in full-stack architecture to deliver robust, scalable AI solutions. Active researcher of emerging AI Agent frameworks and cutting-edge model implementations.

AI & ENGINEERING PROJECTS

- Telegram Semantic Search (RAG): Engineered a Retrieval-Augmented Generation system to index and search Telegram channel history. Implemented vector embeddings to enable semantic understanding, allowing users to find relevant information contextually rather than just keyword matching.
- AI-Powered Development Workflow: Integrated custom AI agents into the daily engineering workflow. Agents automate code reviews, generate comprehensive documentation, write unit tests, and handle type definitions, significantly increasing team velocity.
- Generative Image Platform: Developed an application utilizing models from Civitai for AI image generation. Implemented features for automated asset creation, including a badge generation tool using NanoBanana processing.

HACKATHONS & AWARDS

- Savabit Mining Hackathon - Winner: Developed an MVP for user-friendly ASIC management using Blockchain integration.

- Ioka.kz Fintech Hackathon - Winner: Created an MVP event management platform integrating Mastercard payment systems.
- StudentDigitalFest - Participant: Prototyped an ML solution for optimizing well production systems using machine learning methods.

Experience

Halyk Finservice

2 years 8 months

Team Lead Frontend

January 2024 - Present (2 years 2 months)

Алматы, Алматы, Казахстан

- AI Integration: Led the initiative to integrate AI agents into the development pipeline. Configured LLMs to perform automated code reviews, resulting in higher code quality and reduced manual overhead.
- Automation: Built AI-driven tools to automate documentation generation and test case writing (Unit/E2E), streamlining the deployment cycle.
- Leadership: Leading a stream of developers, decomposing complex technical tasks, and conducting architectural reviews.
- Development: Delivering robust full-stack solutions and overseeing production deployments.

Frontend Developer

July 2023 - December 2023 (6 months)

Алматы, Алматы, Казахстан

- Refactored legacy codebases and developed a unified UI library to standardize development across projects.
- Mentored junior developers and optimized frontend-backend communication protocols.

Kaspi.kz

Software Developer

August 2022 - July 2023 (1 year)

- Optimized high-load internal CRM systems using Vue 3 and TypeScript.

- Collaborated with data teams to improve data visualization within the CRM dashboard.
- Migrated legacy PL/SQL logic to modern web architectures to enhance performance.

Adamar Solutions

Frontend Developer

August 2020 - August 2022 (2 years 1 month)

Алматы, Казахстан

Vue 3, Nuxt 3, Capacitor, Ionic/Konsta, Tailwind CSS, Tauri Framework

- Worked on multiple projects in a frontend team
- Wrote unit, integration, and e2e tests
- Published apps to AppStore and Play Store

DAR

Internship DAR

February 2022 - July 2022 (6 months)

Алматы, Алматы, Казахстан

React, Redux, SCSS, CSS Modules, Nest.js

- Completed daily tasks
- Assisted team members
- Collaborated on a final project

Air Astana

Full-stack Developer

February 2022 - June 2022 (5 months)

Алматы, Казахстан

Vue.js, Quasar Framework, FastAPI (python)

- Worked on optimizing aircraft de-icing processes
- Analyzed processes and designed project architecture
- Managed team members

Morrison

Support & Video Creator

January 2019 - February 2020 (1 year 2 months)

Алматы, Казахстан

- Recorded over 60 tutorial videos on topics including JavaScript, Web Development, and React.js

- Conducted over 50 lessons with presentations explaining specific topics
- Supervised a group of up to 20 students

Education

Graduate School of Business Almaty Management University
Бакалавр , Информационные технологии · (2019 - 2023)
